

## **PRODUCT SPECIFICATIONS**

|                       |                                      |
|-----------------------|--------------------------------------|
| Product Number:       | C1043                                |
| Product Name:         | 5-Chloro-2-hydroxyphenylboronic Acid |
| Formula:              | $C_6H_6BClO_3$                       |
| Molecular Weight:     | 172.37                               |
| C.A.S.:               | 89488-25-5                           |
| Specifications:       |                                      |
| Assay (by Titration): | 97 – 103 %                           |
| FTIR:                 | To Match Standard                    |
| Physical Properties:  |                                      |
| Appearance:           | Off White Powder                     |
